What creates wildly successful women who want more in their lives and their careers? How do you accelerate progression of women in your organisation? How do you get women to bang on the door and shout 'give me that job'?

Track record of SUCCESS

We are proud to say that we have mentored over 25,000 women with our award winning my mentor program over 10 years.

Why has the program had such reach? Quite simply, because it works.

Why a "women's" program?

If men and women are different – why do we insist on taking a 'one size fits all' approach to development, engagement, collaboration, innovation? my mentor: Courageous Woman has been designed based on the rules of marketing to women.

This program is not about FIXING women!! It's about giving them the tools they need to navigate their lives and careers – because men and women are DIFFERENT!

What is it?

my mentor: Courageous Woman is a 12 module virtual (with blended structure) women's development program. It is a pragmatic 'push' strategy that supports the building of your female leadership pipeline, with proven success it gets results that are measurable with the added benefit of many heartfelt personal challenges conquered!

'Mentoring' from 40+ senior leaders

The participants are mentored by Maureen Frank the program's creator through her audio content, and on the videos participants are mentored by nearly 40 senior men and women specifically on the module topics.

How to start:

One program – multiple ways to use it! Getting started is EASY all you need to do:

Step 1: Decide your preferred way of running it and let us know. Details online at emberin.com

Step 2: Give us the names of your local mentoring circle leads or one on one mentors (skip this if this is not your model).

Step 3: Let us know who your in-house facilitator will be (this is the person who we will work with to set up your program based on what suits your organisation best.)

my mentor: MENTOR (for mentors, managers or facilitators) – is a great tool to assist in rolling out the my mentor program depending on your model.
